Vice President's Message

Dear Patron,

A heartfelt thank you to all our loyal customers both in the United States and around the world. We are proud to present our latest medical products catalog. With this issue we have aggressively expanded into several new markets including orthopedic implants, titanium instruments, bi-polar forceps and dermatology instruments. As usual, all our products are available for private-label and custom-manufacturing. We thank you for your support and look forward to many years continued success.

Sincerely,

Jay Younis
V.P. / Sales

Mission Statement:

Tamsco is dedicated to the manufacturing and worldwide marketing of instruments from Pakistan.

We place extremely high regard on:

- The continuous improvement of quality
- The practice of business in a professional and ethical manner
- Our moral responsibility to the community and the natural environment
- The confidence and satisfaction of our customers

Background Information:

We are the sales and marketing arm of a mid-sized Pakistani surgical instrument manufacturer. Our family owned factories there have been producing for over 50 years. Our U.S. facility has been successfully serving the market for over 25 years. We currently export our product line to more than 30 countries around the world.

Although the majority of our sales are under private-label / OEM, we also offer the Tamsco brand as well as our U.S. made Patriot line of surgical instruments.

Our titanium instrument line is 6% Aluminum and 4% Vanadium. Titanium is immune to corrosion, is non-magnetic and has an excellent weight to strength ratio. It's weight is nearly 50% less than that of 400 series stainless steel. Most of our instruments can be produced in Titanium and can be finished in satin or non-reflective blue. Our custom-stellite insert needle holders are US made and offer greater resistance to corrosion and wear than traditional tungsten carbide inserts.
