

TAMSCO AQUARIUM TOOLS

Specialty stainless steel tools for coral propagation and fresh water aqua scaping!

NEW ALLIGATOR SERIES!

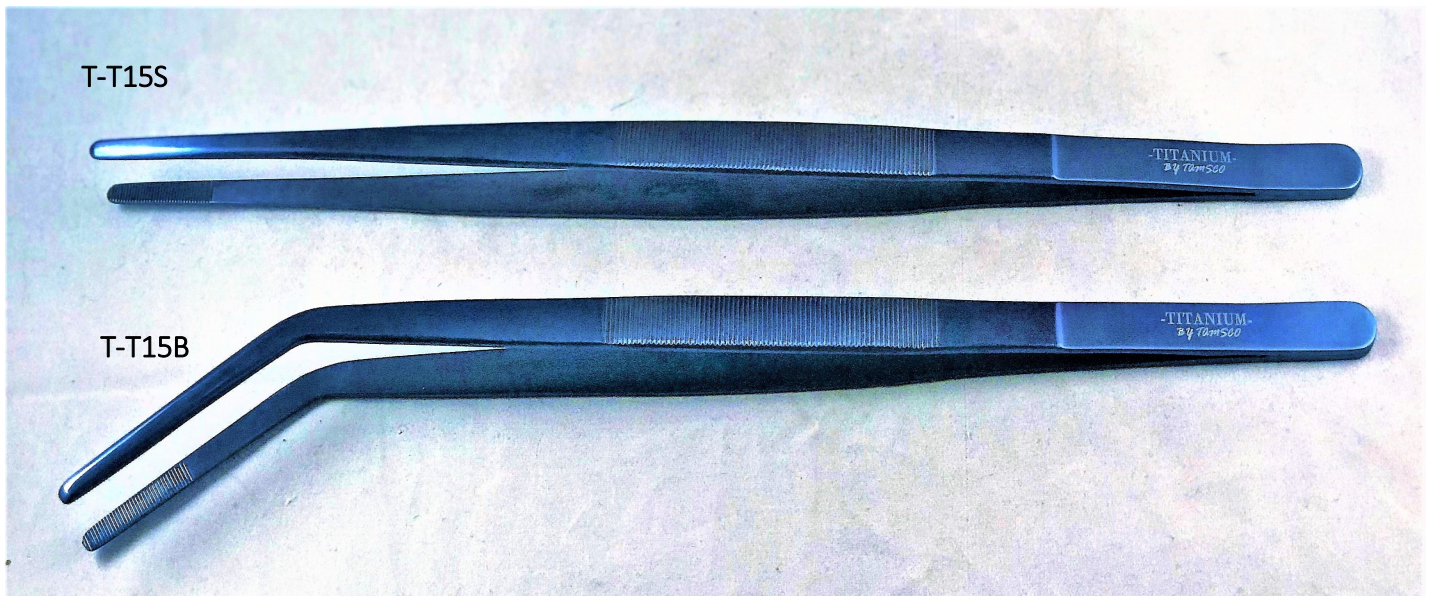

Tamsco is proud to present its new Japanese stainless steel and black oxidized aquarium tools. Our alligator tools make aquarium beautification simpler by allowing you to grab, cut, and reach any part of your aquarium with ease.

-TITANIUM-

By TAMSCO

NEW TITANIUM (6-4) AQUARIUM TONGS

Titanium (6-4) Aquarium Tongs 15-inch with blue anodized finish. Titanium is free of iron so does not rust or corrode even in the salt water environment. Available in straight or bent tip.

OUR TITANIUM LINE IS 6% ALUMINUM AND 4% VANADIUM. TITANIUM IS IMMUNE TO CORROSION, IS NON-MAGNETIC AND HAS AN EXCELLENT WEIGHT TO STRENGTH RATIO. Its WEIGHT IS NEARLY 50% LESS THAN THAT OF 400 SERIES STAINLESS STEEL. MOST OF OUR INSTRUMENTS CAN BE PRODUCED IN TITANIUM AND CAN BE FINISHED IN SATIN OR NON-REFLECTIVE BLUE.

Premium Coral Fragging Tool Kit (5) - M-2268B

Our premium line starts with 420 Japanese Stainless Steel. Much of the production is still done by hand in “old-world” traditions. After production we passivate each tool removing the iron content from the surface area of the steel. This substantially reduces the risk of corrosion. Next we black oxidize each tool further protecting the product from rust or corrosion even in the harshest saltwater environments.

All cutting tools (scissors & coral cutters) are further tempered / emblazed at the tips bringing the hardness to about 47 hrc. This results in superior cutting performance year after year.

The end results are some of the highest quality fragging and coral propagation tools on the market. Premium kit of 5 includes:

- Ø Large SPS cutter – This “bone cutter” is the workhorse of the selection. 7.5” OAL with a 1.5” cut length. Other features include grooved handles for non-slip gripping power, box joint construction to maintain a well-aligned cutting action and a double leaf spring made of reliable spring steel.
- Ø Precision Cutter – 6” OAL with a 0.75 cut length. This tapered head coral cutter is perfect for those hard to reach areas and well as any precision cutting required. Other features include knurled handles for non-slip gripping power, box joint construction to maintain a well-aligned cutting action and a double leaf spring made of reliable spring steel.
- Ø Soft coral knife – 6” OAL. Round body design making it easy to grasp along with knurling at the fingertip for better stability. The knife head is angled 45 degrees to allow cutting into those hard-to-reach and hard-to-see areas. Replaceable surgical quality cutting blades are provided.
- Ø Sharp point scissors – 6” OAL with a 2” cut length. All purpose (sharp/sharp) surgical scissor which works great for soft coral and various propagation techniques.
- Ø Tongs – 12” OAL with 45 degree bend and 2” pvc dipped tips. The most versatile of all aquarium tools. All-purpose and works great for feeding, coral placement, etc...
- Ø Available in zipper storage case or holster.

Premium Aqua-scaping Tool Kit (6) - M-2270B

Our premium line starts with 420 Japanese Stainless Steel. Much of the production is still done by hand in “old-world” traditions. After production we passivate each tool removing the iron content from the surface area of the steel. This substantially reduces the risk of corrosion. Next we black oxidize each tool further protecting the product from rust or corrosion even in the harshest freshwater environments.

All scissors are further tempered / emblazed at the tips bringing the hardness to about 47 hrc. This results in superior cutting performance year after year.

The end results are some of the highest quality aqua-scaping tools on the market. Premium kit of 6 includes:

- Ø Wave Scissors – 10” OAL with a 3” cut length. Designed with a double curve to allow ease of use when trimming foreground plants. Long cut length makes it easier & faster to work the carpet bed of the aquarium. Strong enough to cut both plants and small branches.

- Ø Spring Scissors – 6” OAL with a 2” cut length. Very easy to use spring action requires minimal pressure from the finger tips. Works well for pruning willow moss. Features include grooved handles for superior grip, built in stopper to prevent scissor blades from bypassing. Curved tips allow cutting in the hard-to-reach areas.

- Ø Sharp point scissors – 6” OAL with a 2” cut length. All purpose (sharp/sharp) surgical scissor which works great for soft coral and various propagation techniques.

- Ø Tongs – 12” OAL with 45 degree bend and 2” pvc dipped tips. The most versatile of all aquarium tools. All-purpose and works great for feeding, placement, etc...

- Ø Precision tweezers – 10” OAL. Features include micro-serrated tips for secure grasping, as well as secure thumb grip and smooth external body. Ideal for planting.

- Ø Medium Point tweezers – 6” OAL. Features include grooved handle area and micro-serrated tips. Ideal for arranging aquatic plants.

- Ø Available in zipper storage case or holster.

Black Oxidized Series Aquarium Tools

1090B – Large SPS Coral Cutter 7.5

2260APB—All purpose tongs, 12" with angled, rubber coated head

1210B—Medium point scissors, 6"

1200B— Sharp point scissor

B379B—Tapere head coral cutter 6"

3723BC-Spring action scissor curved 6"

2541B—Wave scissors 9.5", double curved

2251B—10" precision point tweezer

2240B—Pinsetter tweezer 6" medium point

2810B –10" curved clamp for reaching hard to areas

9521B-Heavy coral cutter large opening 8" with lock

1616B– Soft coral knife with blade

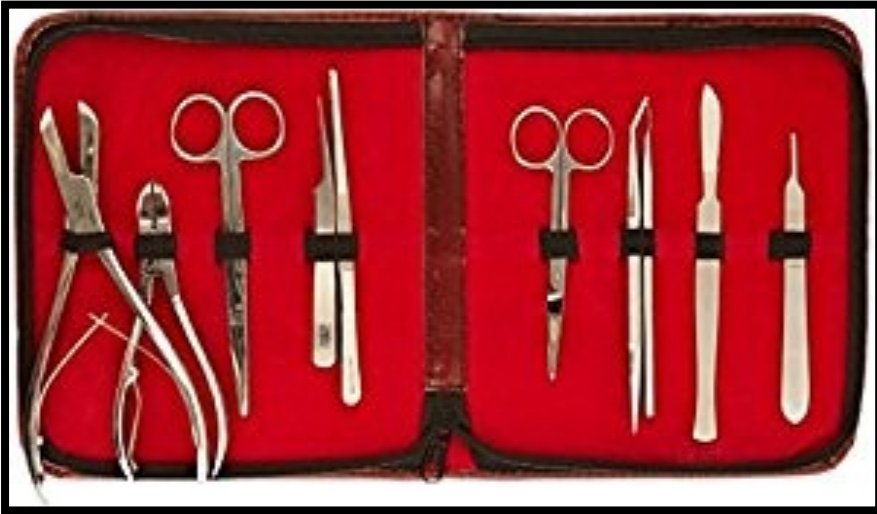

Freshwater Aqua Scaping Tool Set (5 Pieces) from USA—EA-5F

Nano Kit (5 Pieces Under 6" Each) - EA-6N

M-2271—Deluxe Fragging Kit of 10

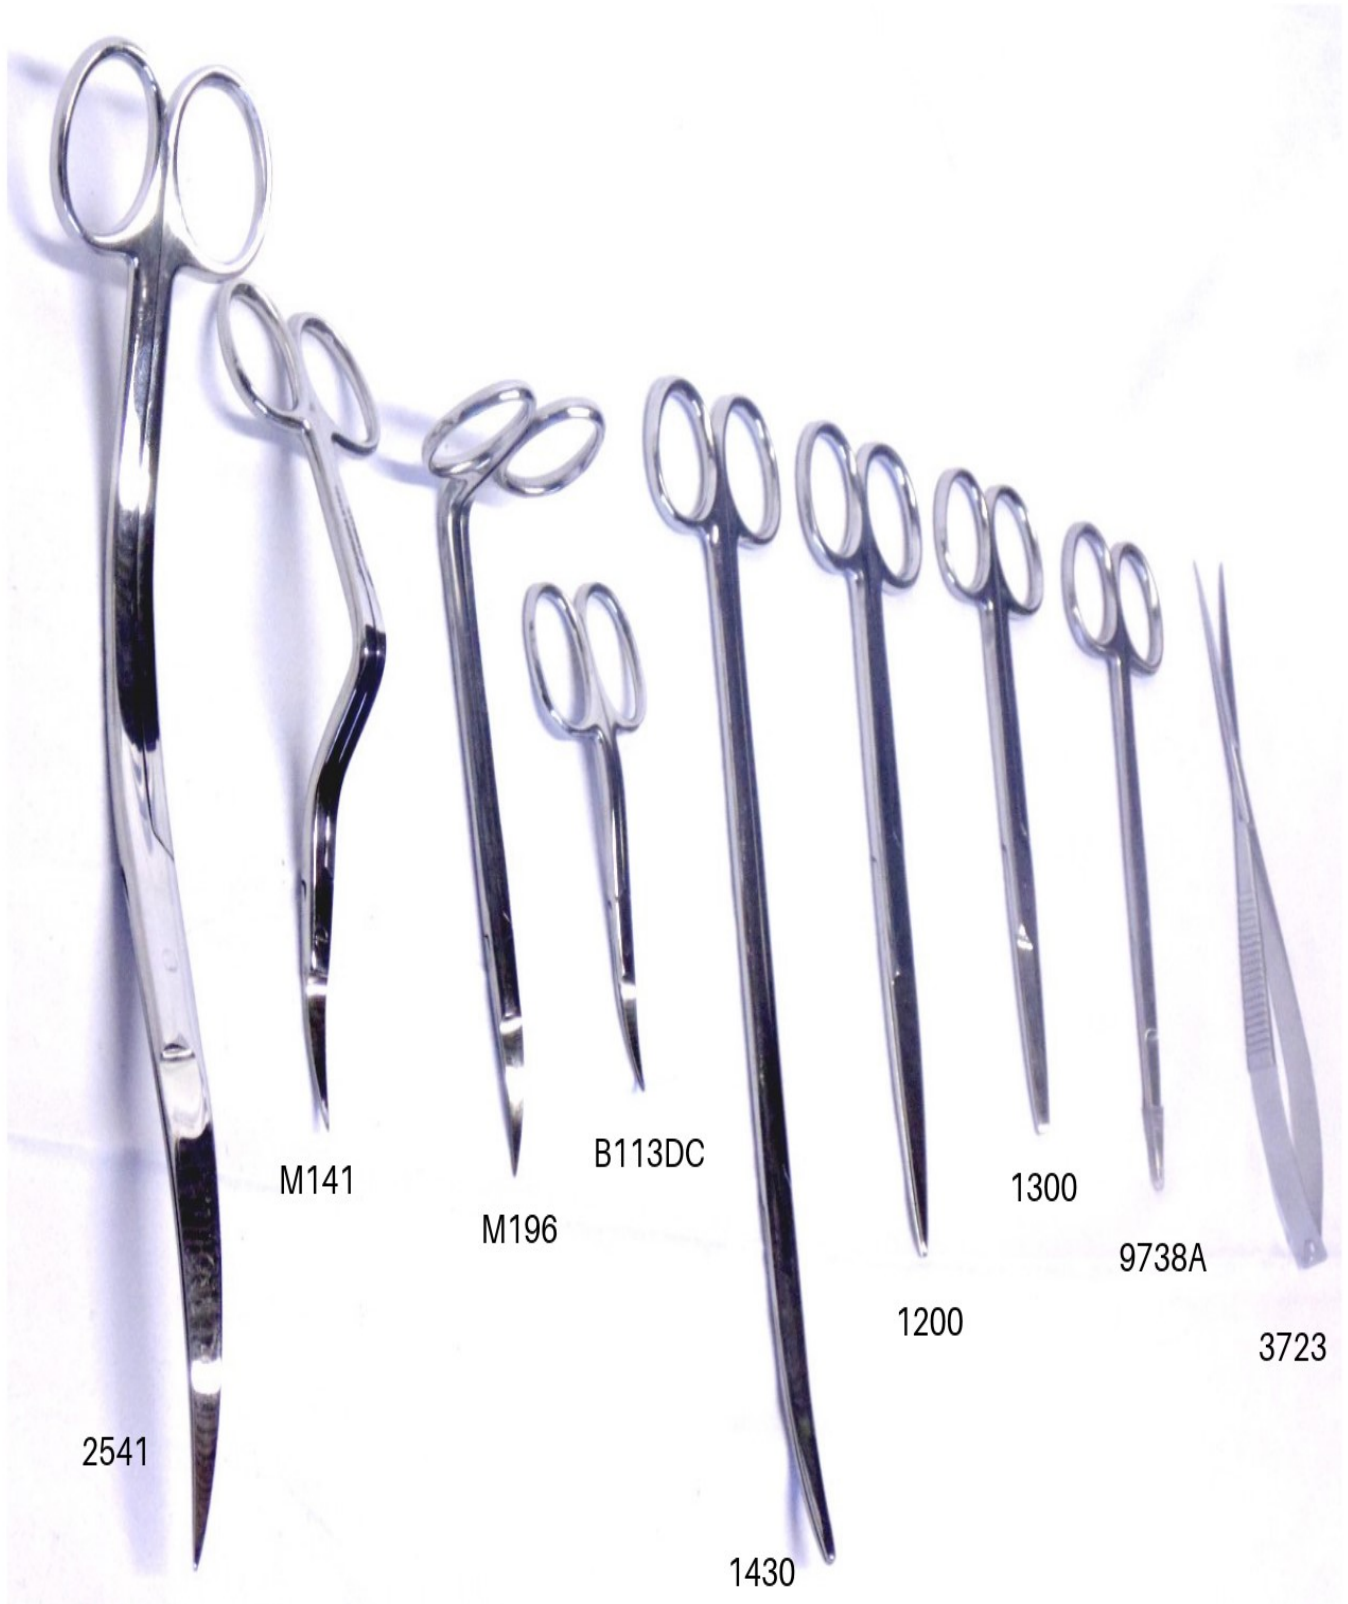

M-2272—Basic Fragging Kit of 4 pieces

Holsters—EA-1H / EA-2H

Precision Scissors for Soft Corals & Aqua Scaping
