Shears and Personal Care Implements

(Since 1978)

## Vice President's Message:

Dear Patron,

A heart felt thank you to our loyal customers, both in the United States and around the world. We are proud to present our latest beauty implement catalog. With this issue we present many new and innovative products such as our green recycled stainless steel line, our pink breast cancer line of implements and a line of ergonomic personal care products for the aging market. We thank you for your support and look forward to many years of continued success.

With this issue we present many new and innovative products such as our green recycled stainless steel line, our pink breast cancer line of implements and a line of ergonomic personal care products for the aging market.

Sincerely,

**Jay Younis**  
V.P./Sales

## Mission Statement:

Tamsco is dedicated to the manufacturing & worldwide marketing of instruments from Pakistan. We place extremely high regard on:

- The continuous improvement of quality
- The practice of business in a professional and ethical manner
- Our moral responsibility to the community and the natural environment
- The confidence and satisfaction of our customers

## Background Information:

We are the sales and marketing arm of a mid-sized Pakistani scissor & instrument manufacturer. Our family-owned factories there have been producing for over 60 years. Our U.S. facility has been successfully serving the market for over 30 years. We currently export our product line to more than 40 countries around the world.

Although the majority of our sales are under private-label / OEM, we also offer the Tamsco brand as well as our U.S. made Patriot line of shears & instruments.

We're proud to announce our new line of Earth-friendly green implements produced from recycled stainless steel.

The new selection of green personal care implements include:

- Cuticle nippers
- Tweezers
- Nail Clippers
- Scissors
- Professional Hair Shears

They are made in Pakistan where the majority of the labor-intensive work is still done by hand. This range is ideal for all segments of the personal care industry; manicure, pedicure, skin care & hair care.

Stainless steel consists of numerous, valuable raw materials such as chromium, nickel and molybdenum. This alone makes recycling stainless steel economically viable. The overall environmental benefits include:

- Minimal use of primary energy
- Saves non-renewable resources
- Reduces the waste stream
- Results in less pollution than milling virgin stainless steel

**B112R:** Cuticle Scissor
